Web applications

Tom Rochette <tom.rochette@coreteks.org>

November 2, 2024 — 36c8eb68

1 General

- 3 different environments: development, staging, production
- Write migrations for schema changes
- Use ORM if possible over raw queries
- Always make it possible for testers to report the version they tested against
  - Simplest is to have a meta field in the head section

2 Steps

- Mockups
- SRS
- Database and software architecture
- Implementation
- Test/QA
- Deployment
